

I am a River Red Gum

Eucalyptus camaldulensis

Each year I sequester 45kg of CO₂ - the same amount emitted by a car trip to Margaret River!!

I have cream flowers in kambarang and birak attracting bees, birds, butterflies, other insects, mammals, and reptiles (geckos love me!!)

I was used by First Nations people to make canoes, bowls, shields, and other utensils, and I have antibiotic uses

I give as much shade as 58 beach umbrellas!!

WHAT AM I?
